What is Clash of Kings?

Clash of Kings Australia is our annual Kings of War tournament where you get the chance to play a series of enjoyable and challenging games, with the aim of proving your worth against your fellow combatants, and of course share in the joy of the Mantic hobby whilst making new friends. This tournament is the largest Kings of War tournament in the Southern Hemisphere and is run across two days. This year it will be 6 games at 2000 points.

We are NOT onsite at the Cancon venue but will only be 1.5km at Canberra Technology Park. Access to the Cancon venue is very simple.

TOURNAMENT RULES

Tournament Placing

Your final placing is determined at the end of game 6, according to the following criteria:

1. The first criteria is Tournament Points (TPs), with more TPs being placed higher. All TP accumulation is used to determine the winner (see accumulation below)
2. In the case of players having the same TPs, the next criterion is attrition points
3. If both of the above are matched, we will separate based on games where these players have played each other during the course of the tournament. The winner of such a match being placed higher
4. Finally, if the players cannot be split, they will share the position

Army Requirements

To take part you require the following:

- Your 2000-point army, mounted on appropriately sized unit bases, ideally fully painted
- Your Force List must be chosen from one of the official army lists. You can spend up to 2000 points on your army (and no more) following the Army Selection rules in the Kings of War Version 3 rulebook/New compendium
- Armies must be composed using the new composition rules in the Kings of War Version 3 rulebook. **ALLIES ARE NOT PERMITTED**
- Armies/characters from the following are allowed:
 - Kings of War Compendium book with the addition of Twilight Kin (found on the Mantic App)
- Kings of war historical lists WILL NOT be allowed as they are not be compatible with the version 3 rules
- Errata can be found in the Kings of War FAQ at <https://www.manticgames.com/mantic-games-free-rules/>. They are also rolle dito updates on the new mantic app.

Scoring/Acquiring Tournament Points

Scoring will use the Blackjack! Scoring system available here <https://www.kowaaustralia.com/blackjack>. Scenarios will only be made available to players on the day.

Points Accumulation – Total available 186 TP:

- Maximum of 126 TPs available from the 6 games
- Bonus 10 TPs for submitting your list on time (By January 14, 2023) **submissions will be via the Mantic app. You will need to contact me directly if some reason you cannot use this.**
- Maximum of 30 paint points (see painting rubric further on in the pack)
- Bonus 10 points for having copies of your list available for your opponent (suggest multiple copies to allow for loss). **Being on the Mantic app does not count as having it available**
- Bonus 10 points for having any number > 1 of Mantic models in your army:
 - Understandably some armies are themed with models from other providers. What I am asking for here is at least one mantic model so this maybe a model that is a part of a multibased unit with other models
 - I am also willing to accept using of mantic terrain crate for multibasing bits to help achieve this goal

Painting Requirements/Choice of Miniatures

When it comes to playing Kings of War, part of the majesty of taking part is playing against beautifully painted miniatures that represent the army you are fighting against. To ensure this happens, we have the following rules to help you plan, build and paint your force.

- Players are permitted to use any number of non-Mantic miniatures in their armies. There is no minimum requirement for Mantic models (except for bonus points)
- You must use war-gaming miniatures and models that don't look out of place in your army.
- Each unit must be instantly recognisable to your opponent as to what it represents. Themed armies are absolutely allowed if they follow this principle.
- Models must be based on the appropriate base size and shape for their type. Unit-basing (or "multi-basing") is permitted so long as the unit footprint is accurate for the unit size.
- Armies must also be representative and not heavily proxied. It should be very clear to any player what the unit is intended to be within the list. It should also clearly look like it belongs in a list for example:
 - Undead units should not be in a non-undead list unless the whole army is following an undead theme or it is truly representative of that unit eg riftwalkers
 - A list should not be a mash of models from various themed armies thrown together to allow the player to use a list for example there should not be something that looks like it belongs in a dwarven army being used as goblins unless it is specific to the unit. There may be exceptions to this based on theme.

If there are any questions regarding this contact me on the email above or via Facebook. Please also see the FAQ below and painting scoring rubric below.

Painting Scoring

This score is focused more on effort rather than results with the intention that everyone should be rewarded for bringing a cool army to the table. Each criterion is worth 6 points and is “yes/no”. There is no scaling.

Points Available 30

1. Is the entire Army painted to a 3 colour minimum standard?
 - 3 colours does not include the primer color.
 - Army painted using a consistent paint scheme across all units & models?
 - Army and units should look cohesive/themed
 - Do models accurately represent what they are meant to be?
 - No confusion between units
 - Eg. Not using same models to represent two different units
 - Eg Not using different models to represent the same unit type
2. Does the Army have consistent/thematic unit basing?
3. Does the army meet MMC, if not do the units adequately fill the space?
 - Eg not leaving lots of blank space to get away with less models
 - Eg not spacing out alternative models for other games systems to get less on

Painting/Modelling FAQ

What is MMC?

MMC is defined as the size below + 1. Please see the table from 2nd edition that demonstrates this. Please note given that it is second edition it does not have all types and is a guide only.

Unit Type	Base Size	Troop			Regiment			Horde			Legion		
		Footprint	MMC	PMC	Footprint	MMC	PMC	Footprint	MMC	PMC	Footprint	MMC	PMC
Infantry	20x20mm	100x40mm	6	7+	100x80mm	11	14+	200x80mm	21	27+	200x120mm	41	41+
Infantry	25x25mm	125x50mm	6	7+	125x100mm	11	14+	250x100mm	21	27+	250x150mm	41	41+
Cavalry	25x50mm	125x50mm	3	4+	125x100mm	6	7+	250x100mm	11	14+	n/a	-	-
Lrg Inf	40x40mm	n/a	-	-	120x40mm	2	2+	120x80mm	4	4+	240x80mm	7	9+
Lrg Cav	50x50mm	n/a	-	-	150x50mm	2	2+	150x100mm	4	4+	300x100mm	7	9+
Lrg Cav	50x100mm	n/a	-	-	150x100mm	2	2+	150x200mm	4	4+	300x200mm	7	9+

I want to take an army such as ogres but have goblins in the list. My goblin models are from a different army so aren't cohesively based with the ogres. Is this acceptable?

Under the current scoring it is not acceptable and won't receive 6 points.

My units are painted different colours but it represents a theme is this ok? Eg Different units of humans representing different regions in a KoM army.

Yes this is fine as long as the basing brings the army together cohesively. It should be appropriately based on not just blue tacked together to make it work.

My cavalry regiment I want in a spear formation and this best fits as 5 models is this ok?

Under the current scoring if the rest of the base is reasonably blank then no. IF effort was made on the rest of the base to make it look like the spear formation is charging through restrictive terrain then this will likely be ok.

Can I use other models to fill out space? Eg a battle cat on a cav base to meet MMC.

Yes I would regard this as acceptable. It would not be acceptable if it was not a model of sufficient size for example an orcling style model to represent an extra model amongst large infantry.

Terrain

Terrain will be standardised heights:

- Fields/Ponds: Flat/Height 1. As per companion update

iii. FLAT TERRAIN P28

Flat (usually Difficult) terrain does not have a height value and is treated the same as open ground for the purposes of Line of Sight and establishing if a unit is an Obscured Target. Flat Difficult terrain is counted as height 1 for the purposes of checking if a unit is a Concealed Target.

- Obstacles: 2 (never block line of sight)
- Forests: 10
- Hills: 3
- Buildings/Impassable: 8

Maps used will be blackjack maps which will change each round. Every table for a given round will be the same.

Clean/Friendly Play

Kings was designed as a rules set that promoted clean and fair play and whilst the following aren't necessarily rules they are expectations of what would normally constitute behaviours that make the experience of kings better for all. This is not a fully inclusive list but is a list of things which have arisen frequently in previous years. It is a list that I will refer to if receiving any complaints about a player.

- Be on time for when dice are meant to start rolling
- When rolling dice take out the "misses". This allows your opponent to confirm that the hits are correct. Do not do it so quickly that they have no opportunity to observe
- When it comes to dice make sure you have dice where the pips are clear for you opponent to see and also be clear on what the symbols represents if you have symbols replacing a 1 or 6. You should not have a mix of dice where different numbers are replaced on different dice, consistency is key
- Do not be taking moves back without having marked your previous starting position. If you are unsure of your moves a good habit is to mark your starting positions whilst your opponent is taking their turn
- Don't whinge about your dice rolls the whole game
- It is good practice to discuss your intent when moving particularly if something is very close. For example if you are intending to stay just 16 inches away from cav with speed 8, that you say your intent is that they are out. This also give your opponent opportunity to check.
- If you have multiples of the same unit but some have upgrades or items, mark this on your sheet for your opponent or having a differentiating piece on the base that you then discuss
- If you forget something in your turn, it is ok to to ask your opponent if you may do something if it does not effect how the games is playing. For example your opponent may be starting to move but you forgot a regen you may ask to re do it. But they they do not have to allow it. If they however have moved multiple units and may have taken that amount of damage into account when charging, then wear your mistake and move on.
- Manage your own clock. The onus is on you to start and stop your clock. The clock is not to be stopped for checking stats etc only for genuine rules queries that you and your opponent cannot come to agreement on. If you forget to switch your clock at the end of the turn if your opponent notices it is obviously good practice for them to switch for you but it is not their job to remember for you.
